## **SERUM GRANTS**

## **Executive** Summary

We are passionate about providing ease of use for DeFi users.

The ezDeFi ecosystem currently has:

- A crypto wallet that are supported mobile & desktop.
- A public blockchain with unique features: Instant transfer and zero transfer fee.

Recently, ezDeFi acquired the Nexty blockchain platform, which was used to reach 60 million dollars in capital market in 2018.

In addition, ezDeFi is ambitious, wants to integrate with central bank digital currencies (CBDC) to support all available digital currencies from different countries.

Mobile Wallet Application

Web browser Extension

## **Mission** and **Vision**

## **Mission**

Bringing DeFi closer to the non-crypto users, while providing valuable experience of safety, security and extremely convenient features for crypto users in general.

## <u>Vision</u>

Become the world's leading noncustodial ecosystem for DEFI: store / exchange / stake their crypto assets and interact with D-apps

## **Token** Specification

• Name: ZD

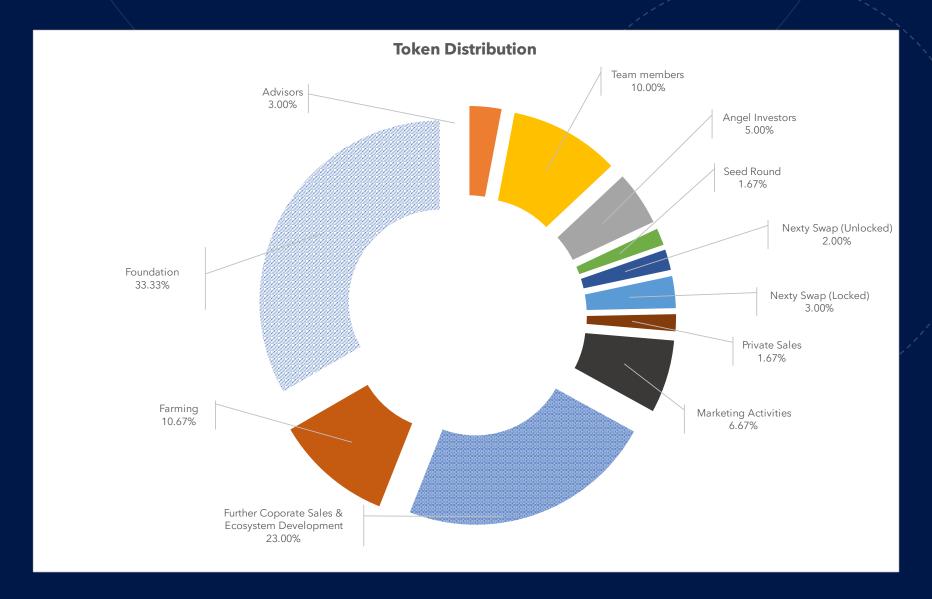

• Symbol: \$ZD

• Network: Binance Smart Chain (Token) & ZD Chain (Native coin)

• Spec: Bep-20 & ezrc20 (Native coin)

• Precision: 18

• Smart Contract Address: 0x1c213179c2c08906fb759878860652a61727ed14

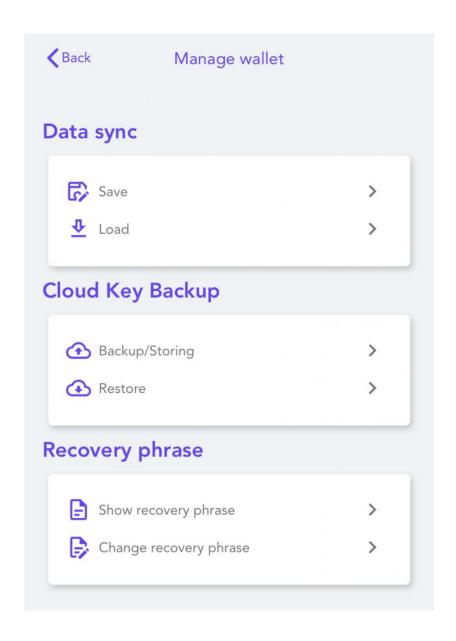

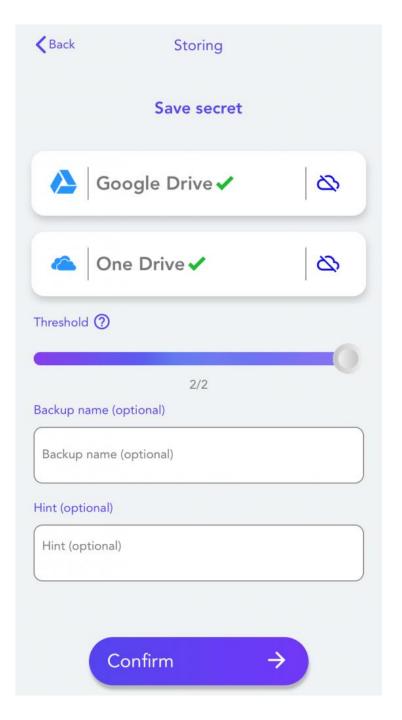

# No more centralized mechanism.

Users can manage their own data via their own cloud. You hold your data, We hold decentralization

into different pieces and save them on users' secret clouds. This is the first-ever cloud data backup and recovery solution for a crypto wallet

ezDeFi

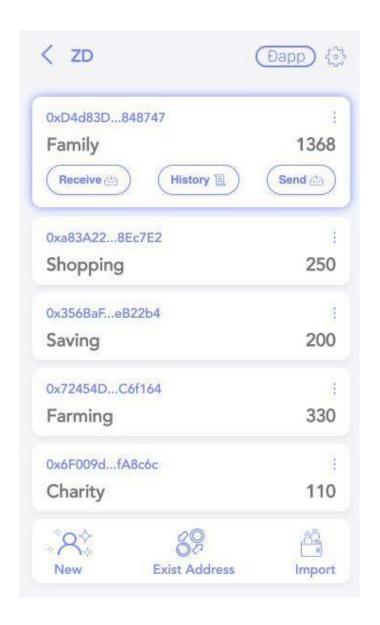

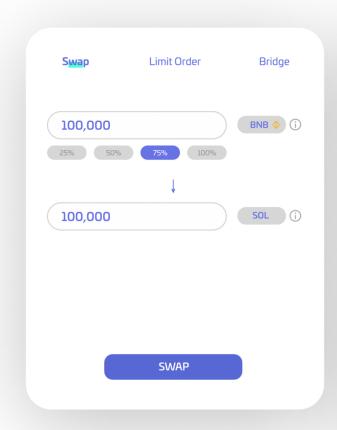

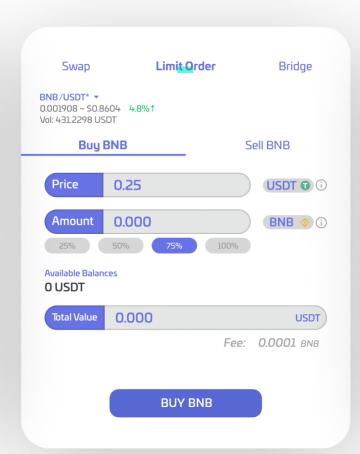

## ezDeFi multi-address feature

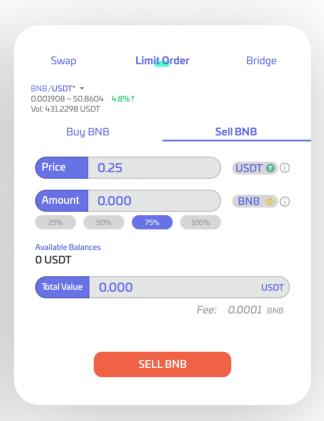

helps manage your token addresses for sensible financial decisions.

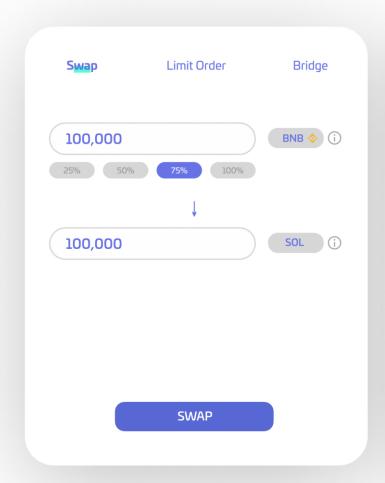

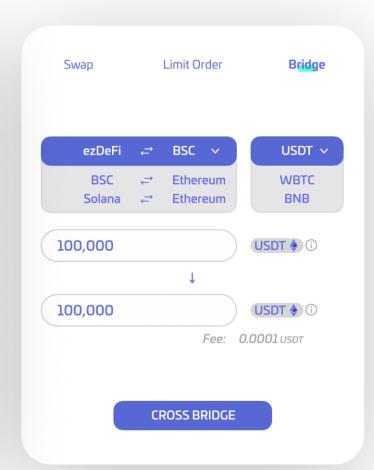

#### **OneUI for AMM, Farming and Staking**

Limit order on different AMM system Native Auto Yield Aggregator

## Onchain Swap & Crosschain Bridge

Swap tokens from different networks: Solana, Ethereum, Binance Smartchain, ezDeFi, Tomochain

THANK YOU FOR YOUR ATTENTION!
